

Connected services

Digital platforms for UPS selection,
installation and operation

When **energy** matters

There is always a service to support your business. Discover the one that suits you.

	User	Device	Function
Selection Online platforms	UPS selector Reseller, VAR, system integrator, specifier, distributor		Choose the ideal UPS solution for your application - today and tomorrow - from 600 VA to 120 kVA
Design Online platforms	eRULER Electrical installer, specifier		eRULER specifies the key electrical and physical parameters to prepare and size the UPS installation
Installation Mobile apps	eWIRE Electrical installer		eWIRE application provides clear and comprehensive guidance via your mobile phone for an easy and foolproof UPS installation activity
Operation Mobile apps	SoLive UPS Facility Manager, IT Manager, Energy Manager		SoLive UPS is a mobile application to monitor the UPS: <ul style="list-style-type: none"> • Overview of all installed units • Real-time alarm and notification • Dashboard with operating parameters
Maintenance Cloud service	SoLink End-user through service center		SoLink is the Socomec 24/7 Remote Monitoring Service connecting your UPS to the nearest Socomec Service Centre

Connected services - for a better UPS experience.

Online platforms

UPS selector

Make the right UPS choice

eRULER

UPS installation automatic sizing

The UPS Selector is the ideal interface to choose the UPS best suited to your specific applications.

Enter just a few pieces of information:

- Load value.
- Input and output voltage.
- Back-up time.
- Spare power capacity.

By entering just a few parameters, a comparative file is generated that presents three proposals to meet your needs. The Socomec Team will then respond with a quote within 24 hours.

Quick sizing for installers and consultants when preparing and specifying the electrical and physical parameters of a UPS project.

Configure a system by selecting power size, voltages and performance level.

Receive a comprehensive suite of information to support the planning of the UPS installation:

- Electrical diagram.
- UPS dimensions.
- Protection sizing.
- Terminal type.
- Heat dissipation.
- Available in more than 10 languages.

Together, step by step.

Mobile apps

eWIRE

Tutored UPS installation

Using Augmented Reality technology, eWIRE recognises the UPS to be installed by simply focusing it with the installer's smartphone camera.

eWIRE provides step-by-step instructions to correctly position the UPS, verify electrical protection and guide the cabling of both the UPS and battery.

Once the installation is complete, eWIRE sends a detailed report to the Socomec Services Centre to validate the installation report and authorise the commissioning to be performed by the Socomec Services team.

Activation code:

SoLive UPS

UPS status always in hand

SoLive UPS enables the customer to monitor the system - in real-time, via smartphone - by connecting the UPS to the Socomec cloud platform.

The mobile app automatically reports the latest status of the installed UPS, displays alarms and provides instant notifications of any unexpected events.

Data provided:

- Current status of the UPS.
- Battery level.
- Battery back-up time minutes.
- UPS operating temperature.

Contact your local agent to learn more about the availability of this service.
